

ENERGY QUALITY IMPROVER

BY OPTIPOWER, INC.

- Energy Quality Improver is a device developed by OPTIPOWER Inc. in Chandler, Az.
- Its design and construction is made to improve the quality of electrical energy.
- The reduction in the electric energy bill is reflected after the first month of installing the Energy Quality Improver .
- By knowing the electrical parameters of the oil well, the Energy Quality Improver is designed, built and installed. Savings ranging from 12% to 30% are achieved.

- Reduces overload on electrical cables.
- Lowers the temperature in electrical switches.
- The Energy Recovery System is an optional accessory that converts the electric field produced by circulating currents in the wires that connect the Energy Quality Improver.

BUSINESS DESCRIPTION
